

Vehicle door with emergency opening system

Safety

CAR COMP.
BODYWORK

Key

Car tailgate

Emergency opening

Door lock

Trunk compartment

Innovations/advantages

Instant and safe emergency door opening;
Reduced finishing costs and times;
Versatility of use (Sliding side door, tailgate, etc.);
Emergency key slot always available.

Application field

OEMs;

Product insight

In the continuous process of designing new systems that guarantee ever greater vehicle safety, Italdesign has developed a patented vehicle door emergency opening system to be used in the event of an accident or accidental closure, providing a key that can be found quickly and safely so that the person stuck inside the vehicle can immediately open the car or the load compartment of a commercial vehicle.

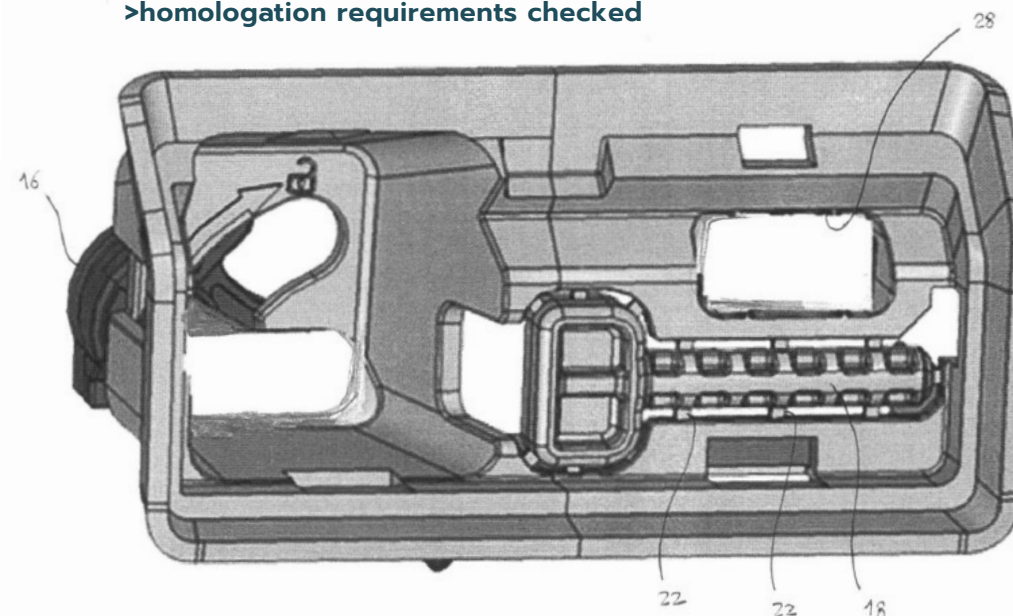

Patent Information

Priority Date – 11 February 2019
Application Number
PCT/IB2020/051006
Publication Number
WO2020/165719 A1
IPR Dossier n. A11

National patent filings

>homologation requirements checked

Available from April 15th, 2020
