

## **Davide Casini**

### **Chief Technical Officer**

Davide Casini graduated in Mechanical Engineering from Politecnico di Torino in 1998. He joined Italdesign in 1999, working as CAE engineer for five years. He then served as BIW leader for two years, before relocating to China in 2006 to oversee the establishment of Italdesign's Shanghai office.

Returning to Italy in 2007, Davide joined the project-leading department, working as a technical project leader for European and Asian clients. From 2010 to 2014, he was responsible for the technical coordination of Audi projects developed at Italdesign.

In 2015, he was appointed Head of Vehicle Safety and Functional development, coordinating teams in active and passive safety, numerical simulation, aerodynamics, thermal management, and air conditioning. Since 2017, he has also managed the activities of the strategic group project on 'Digitalization'.

As of November 1<sup>st</sup>, 2021, Davide serves as Italdesign's Chief Technical Officer.
